You have tried the rest now try the best. When the Minn. 1166 Everbearing starts to fruit in July, 1945, you will have a variety that will truly arouse the envy of your friends. This new Minn. 1166 has outyielded both Mastodon and Gem. A record patch of 5,000 plants set in the spring, made over \$2,400.00. There is money in Everbearing Strawberries when one can take a single Acre and make over \$2,000. We did it and so can you. A U. S. Record. Set and harvest all in 129 Days. Just stop and think. A quick cash crop this summer in less time than you could grow vegetables. A Golden Harvest with an enormous crop of gigantic Strawberries. Summertime's most delicious fruit. After August there is no other berries but the Everbearing Strawberry. The later the season the heavier they bear.

Light frost will not hurt them. Every garden should have a strawberry bed and pick big luscious berries. After the plants are set, keep off the buds until July. Let only 4 to 6 new plants set to the foot. Clip off the rest. Get more and larger berries. Strawberries solid dark red. No green tips. Ripens evenly. Easy to hull. Giant size at all times of the season. These sparkling jewels have a flavor excitingly rich and tempting. Honey-sweet when dead ripe. You could not ask for more. A double duty Strawberry. Two full crops of Strawberries this year and a full crop in June 1946. Remember the **EARLY BIRD**. Plants are **SCARCE**. So order your share at once. No chance of **MIXED** plants, will be tied with **BLUE** string.
